

Control Remote Devices

Gate Floodlights Sounder Bell Box

Up to 16 IP Cameras with a relay on each

LAN Connection

Gate Floodlights Sounder Bell Box

Analogue CCTV Camera

Using the remote control relays with in the client software, you can connect to the dvr9K via a PC or laptop and switch up to 4 devices on or off. When used with IP cameras, the dvr9K can trigger a relay for each one - up to a total of 16!

These relays can control lights, sounders, gates, bell boxes or other suitable devices to detect intruders or give access to bonafide visitors.

For example, you may see an intruder on site and want to warn them off by triggering a sounder from the comfort of your office or even from your home miles away.
